LeetCode | Portfolio

Professional Summary

Full-Stack Developer pursuing an integrated B.Tech + M.Tech in Information Technology at ABV-IIITM Gwalior. Skilled in MERN/PERN stack development, REST APIs, backend engineering, and Data Structures & Algorithms. Experienced with React.js, Node.js, Express.js, MongoDB, PostgreSQL, and Python, with an interest in scalable software engineering and system design.

Education

ABV-IIITM Gwalior 2024–2029
Integrated B.Tech + M.Tech in Information Technology | CGPA: 7.15 *Gwalior*

Technical Skills

Languages: C, C++, JavaScript, Python, Java (Basics)
Python Libraries: NumPy, Pandas, Matplotlib, NetworkX
Frontend: HTML5, CSS3, React.js, React Router DOM, jQuery
Backend: Node.js, Express.js, REST APIs, JWT Authentication, MVC
Stacks: MERN, PERN **Databases:** MongoDB, PostgreSQL, MySQL
Tools: Git, GitHub, VS Code, Postman, Android Studio
Core Subjects: DSA, OOP, DBMS, Operating Systems, Computer Networks
Certifications: Google Cloud Generative AI; Forage – Software Engineering Job Simulation (Commonwealth Bank)

Projects

UniNexus – Centralized Campus Platform
MERN Stack, AI-Powered Feed System

- Collaborated on a centralized platform for campus clubs, events, and student communities.
- Developed modular backend APIs and structured feeds; working on personalized AI recommendations.

YatraMitra – Travel Ticket Booking Platform
Node.js, Express.js, MongoDB

- Built a travel booking platform supporting buses, trains, and flights, with authentication and REST APIs.
- Implemented CRUD operations and modular MVC-based backend architecture.

CineVerse – Movie Ticket Booking Platform
React.js, Vite, Node.js, Express.js, PostgreSQL, Sequelize, Gemini AI

- Built a cinema booking platform with JWT authentication, role-based admin controls, movie discovery, and seat reservations with concurrency handling.
- Integrated Gemini AI recommendations and a conversational cinema assistant, plus booking management and cancellation.
- Implemented snack ordering, UPI QR/Stripe payment flows, and printable tickets with QR verification using PostgreSQL and Sequelize.

Real-Time ECG Monitoring & Diagnostic System
ESP32, AD8232, Machine Learning

- Built an ECG monitoring system using ESP32 and AD8232, streaming sensor data to a web dashboard for visualization.
- Explored machine learning for cardiac abnormality prediction.

Leadership & Activities

Event Head – Infotsav
ABV-IIITM Gwalior

- Managed technical and cultural events with student teams and volunteers; coordinated logistics, scheduling, and collaboration.

Coding Profiles

- **LeetCode:** Profile – Solved 500+ DSA problems.
- **GitHub:** Profile – Full-stack projects and repositories.

Achievements

- Solved 500+ Data Structures and Algorithms problems.
- Built full-stack applications using React.js, Node.js, Express.js, MongoDB, and PostgreSQL.
- Earned Google Cloud Generative AI certification badges.
- Completed the Forage Software Engineering Job Simulation by Commonwealth Bank in June 2026.
- Exploring open-source software development and collaborative engineering.
